

Valhalla Contact Form

Google Maps

Google Maps is enabled by default in your form, but you can disable it in the Google Maps tab.

Setting a Place Name or Address

You must type an address or a place name in the appropriate field following some rules. First, every word must be followed by a + (plus) sign except for the last one. Second, there can be no spaces before or after the + sign. Examples:

[central+park+new+york](#)

[1600+Amphitheatre+Parkway+Mountain+View+CA](#)

Whether the first letter of a word is capitalized or not is irrelevant.
