Labels and Messages

When you create a new form, all labels for name, email, phone, subject and message fields come with a shortcode that renders the label for that field. Also, when you use the Add a Label button in the Form tab, it automatically includes the shortcodes for these five fields. Edit them in the Labels and Messages tab.

<i>Name field</i>
Name
<i>Email field</i>
Email
<i>Phone number field</i>
Phone
<i>Subject field</i>
Subject
<i>Message textarea</i>
Message

When a form is submitted, a successful message is shown. When some error occurs or when a required field is left empty, error messages are shown as well. You can also edit them.

<i>Sender's message was sent successfully</i>
Thank you for your message. It has been sent.
<i>Sender's message failed to send</i>
There was an error trying to send your message. Please try again later.
<i>Validation errors occurred</i>
One or more fields have an error. Please check and try again.
<i>Submission was referred to as spam</i>
There was an error trying to send your message. Please try again later.
<i>There are terms that the sender must accept</i>
You must accept the terms and conditions before sending your message.
<i>There is a field that the sender must fill in</i>
The field is required.
<i>There is a field with input that is longer than the maximum allowed length</i>
The field is too long.
<i>There is a field with input that is shorter than the minimum allowed length</i>
The field is too short.
